

# Nabil Ajwad Bin Rosedi

## Senior Software Engineer

### Summary

I design and build scalable web, mobile, and cloud applications that help businesses automate operations, improve customer experiences, and accelerate digital transformation. My expertise spans Flutter, Laravel, AI integration, cloud deployment, and API-driven systems, enabling me to deliver production-ready solutions from concept to deployment.

### Education

**UniKL MIIT**

**2014-2019**

**Computer Systems Networking and Telecommunications**

Grade: 2.8

Final Year Project:

Car Tracking using Arduino and GSM

### Experiences

#### Senior Software Engineer

**Megah Fintech Sdn. Bhd.**

**Jan 2025 - Jun 2026**

- Successfully led the development of fintech solutions that improved user engagement and system reliability.
- Designed and implemented secure payment-related features and RESTful APIs for enhanced functionality.
- Worked on blockchain integrations, including smart contract interactions, to innovate transaction processing.
- Participated in software architecture planning and code reviews, ensuring high-quality deliverables.

#### Software Engineer

**Myrich Dynasty Networks Sdn. Bhd.**

**Feb 2023 - Dec 2024**

- I successfully contributed to the development of innovative software solutions at Myrich Dynasty Networks Sdn Bhd.
- Developed enterprise web applications with Laravel, improving system performance and usability.
- Enhanced user experience by building cross-platform mobile applications using Flutter.
- Collaborated with teams to implement new features and optimize existing functionalities.

## Experiences

### Full-stack Developer

**AdEasy**

**Mar 2022 – Sep 2022**

- Collaborated in Sprint Planning meetings to gather requirements for enhancing AdEasy's website.
- Analyzed user and departmental needs to ensure operational feasibility of proposed solutions.
- Developed, tested, and refined code to meet the requirements of users and various departments.

### Programmer

**Pocketdata (m) Sdn. Bhd.**

**Dec 2020 – Feb 2022**

- Participated in daily SCRUM meetings to ensure project alignment and progress tracking.
- Analyzed user requirements to determine operational feasibility and develop effective solutions.
- Maintained confidentiality of operations while collaborating with team members on the SPR Project.
- Wrote and tested code, refining it as necessary to enhance functionality and performance.

## Skills

### Mobile Development

- Flutter
- Flutter REST API Integration
- Firebase Integration
- Mobile App Deployment (Google Play Store / Apple App Store)

### Frontend Development

- React.js
- JavaScript
- TypeScript
- HTML5
- Bootstrap
- Responsive Web Design

### Backend Development

- Laravel
- PHP
- RESTful API Development
- API Authentication (JWT / OAuth)
- Microservices Architecture
- Third-party API Integration
- Payment Gateway Integration

## Skills

### Database

- MySQL
- PostgreSQL
- Firebase Firestore
- Database Design & Optimization

### Cloud & DevOps

- AWS Amplify
- AWS Cloud Hosting
- AWS S3
- AWS EC2
- GitHub Actions
- Git
- Linux Server Administration
- Nginx
- Apache
- cPanel
- WHM
- Plesk

### AI & Development Tools

- GitHub Copilot
- Claude
- ChatGPT

## Certificate

- Creating a Responsive Web Experience
- HTML & CSS: Creating Forms
- Learning PHP: Building Dynamic Websites from Core Concepts to Applications
- Database Design Fundamentals
- Flutter Essential Training: Build for Multiple Platforms
- Building a Website with Laravel, React.js, and Inertia
- Designing RESTful APIs
- Git Workflows

## Projects

- E-DA Wallet
- Penang Smart Kariah
- Sistem Pengurusan Bersepadu (SPB) MAINPP
- MYBARAKAH COIN (MYBC)
